\$3.4B

Lost by Adults 60+
USA · 2023

BACKGROUND

Elder-care apps boost trust but create a security blind spot. An app-store audit of top senior apps found **no built-in scam detection** — a critical gap as FTC-reported losses climbed **5× since 2018**.

Easier apps
→ Higher trust
→ More scams

TARGET USERS

Living Alone

No one to verify suspicious content

Low Income

Targeted by fake deals and prize offers

Low Digital Literacy

Cannot identify misleading ads or links

Our Solution

AI safety layer: detect threats, warn instantly, guide safely

CORE INNOVATION

AI Scam Detection

NLP scans ads and links in real-time before user interaction.

Instant Warning

Plain-language alert — no jargon, one clear action.

Simple Guidance

One-tap safe action; model learns from user reports.

Conclusion

Fraud losses among adults 60+ have grown **5× since 2018** — driven by the gap between accessible UX and zero protection.

Our AI system closes this gap: real-time detection, plain-language warnings, continuous learning.

Protecting seniors online is a social responsibility.
